⊗ ELTAM EIN-HASHOFET

Eltam Ein Hashofet is a leading international manufacturer of ballasts for Fluorescent and HID lamps. For more than 40 years, the company has been involved in the design, production and supply of ballasts and other magnetic and electronic accessories for the lighting industry. In addition, the company has established itself as an approved supplier of stamp sheet metal parts and sub-assemblies for the automotive industry.

Standards: Eltam complies with the ISO 9001/ 2000, the ISO 14001 standards And the ISO TS 16949, the standard for automotive companies.

Inhouse R&D and Engineering: Eltam has inhouse Research and Development teams working in the fields of advanced electronic ballasts, control systems for LED lamps and other cutting edge lighting technologies.

Production: All of Eltam's products are assembled by a highly automated process, including state of the art inspection and quality control equipment that has been developed by Eltam's engineers.

Customer Service: Customer Service is a central part of ELTAM policy, which contributes to ELTAM's continuing success - just in time delivery according to customer requirements and prompt reactions to new market demands.

EHID & ON-SiTE - System concept

Eltam's product range of electronic ballasts for HID lamps, the EHID, presents a significant advance in electronic ballast technology by offering flexibility and compatibility with various controllers and communication systems.

The EHID ballasts & the ON-SiTE controlling systems create unique synergy that allows for sophisticated levels of monitoring and control.

This combination allows for:

- Flexible control schemes and dimming scenarios
- Real Time monitoring and logging of supply network, lamp condition & performance
- Planning and documentation of the maintenance procedures (lamps, light fixtures, ballasts)

Open system – our products are compatible with various lighting controllers and components available in the market.
